Case Study: Migrating from MPLS to SD-WAN

MCG Architecture

MCG Architecture is a 90-year-old architecture firm that specializes in modern commercial work including shopping centers, office buildings, hotels, mixed-use urban and suburban developments, and land planning. Their MPLS network initially solved office connectivity issues, however, network issues became slow to resolve. MCG also struggled with aging phone systems, disparate networks, inconsistent technologies across their five offices, and managing multiple vendors. MegaPath implemented the following solution to solve these challenges:

- Internet and Hosted Voice from MegaPath gives employees a consistent, high-quality phone system across all of their locations, while simplifying vendor management.
- Migrating from MPLS to SD-WAN gives MCG the flexibility and redundancy their business requires for optimized application performance and uptime
- BIPsec and Managed WiFi provides employees seamless private corporate network access from any office while visitors can connect via guest WiFi

May Partner Webinar

Managed SD-WAN and Next-Gen Managed Firewall/Security

**WEBINAR: Managed SD-WAN &
Next-Gen Managed Firewall/Security**

REGISTER NOW

Managed SD-WAN greatly improves performance and cost of the WAN, but additional security is required beyond the SD-WAN VPN. Providing Next-Generation Firewall capabilities creates profitable revenue streams while providing customers with a fully managed, secure Wide Area Network.

MegaPath's Director of Enterprise Products, SL Sweet, will cover topics that come into play, such as:

- SD-WAN Native Security features and benefits
- Next-Generation Firewall features and benefits
- Positioning an integrated SD-WAN and Security offering

WEBINAR: Managed SD-WAN and Next-Gen Managed Firewall/Security

- [100% Uptime SLA with MegaPath RED](#)
- Discounted [T1](#) and [Ethernet](#)

*For details, terms & conditions, view the Q2 Promo & Spiff Summaries on our [Partner Catalog](#)

** MegaPath is currently offering the Polycom VVX 411 for its promotional free phone offering. The look and feel of the phone is identical to the VVX410, however, the VVX411 is the latest generation of Polycom hardware which extends the lifecycle of the phone. It also has processor and memory upgrades for better performance.
