MegaPath Asymmetrical Ethernet
High Speed, Low Cost

Meet your bandwidth requirements without overspending with low-cost, high-speed, Asymmetrical Business Ethernet.

Businesses constantly require increasing amounts of bandwidth, making the right Internet access choice essential for business success. MegaPath's Asymmetrical Business Ethernet service is ideal for businesses with locations or remote users that have greater downstream than upstream bandwidth demands. It provides low-cost connectivity options to meet individual bandwidth needs without overspending. And, it is delivered over an infrastructure that is built to meet the highly demanding needs of businesses. A superior alternative to cable which also delivers asymmetrical bandwidth, MegaPath's Asymmetrical Business Ethernet service offers business-class performance, reliability, and service level agreements.

More Downstream Bandwidth Support

In addition to offering symmetrical Ethernet speeds up to 1x1 Gbps, MegaPath provides a variety of cost-effective, asymmetrical speeds up to 50x10 Mbps for businesses that have higher downstream than upstream traffic demands, such as:

▶ Customers that heavily use off-premises servers and services

▶ Customers without servers on premises

▶ Customers with non-mission critical applications

▶ Branch offices that access applications from headquarters

▶ Remote office locations that do not upload a lot of content

High-Performance, Dedicated Broadband

While MegaPath's Asymmetrical Ethernet service competes directly with cable services by delivering low-cost, asymmetrical bandwidth, it offers several advantages over cable including:

▶ Dedicated vs. shared bandwidth

▶ Engineered for Quality of Service (QoS) and Class of Service (CoS) to support performance-critical applications like voice and video

▶ Business-focused provider

▶ Support for performance monitoring services

▶ A more reliable site prequalification process determined by actual address and central office location

Benefits

▶ Low Cost

▶ Dedicated Bandwidth

▶ Uses Existing Infrastructure

▶ Business-class Platform Engineered for QoS/CoS

▶ Support for performance monitoring services

▶ Reliable Site Prequalification

▶ 24/7/365 Support

MegaPath®
A Fusion Company

Easy to Install & Manage

Ethernet utilizes your existing copper infrastructure to ensure rapid deployment and a seamless connection. MegaPath will provide a trained technician for a worry-free installation.

Guaranteed Reliability

MegaPath's Asymmetrical Ethernet services come with a 99.9% uptime guarantee, or 99.99% with proactive monitoring. Our robust service level agreement (SLA) also guarantees response times and installation intervals. Visit www.megapath.com/sla to review our SLAs. Note that MegaPath also offers symmetrical Business Ethernet services, which come with a 99.99% uptime guarantee, or 99.999% with proactive monitoring.

24/7/365 Support

Our experienced support agents are available around the clock to answer any questions that arise. We can even dispatch repair technicians after hours, on weekends, and on federal holidays to keep your business operating.

Discover Proactive Monitoring

MegaPath Proactive Monitoring service constantly checks the status of your MegaPath Internet connection—24/7/365. If we detect an issue, we will automatically contact you via email, create a trouble ticket, and quickly work to resolve the issue and minimize your network downtime. Using our self-service portal, you can stay in control of notification schedules and more. Ask your MegaPath Account Representative for details.

The MegaPath Advantage
